DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 16-28 in the reply filed on 22 January 2007 is acknowledged. Claims 29-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 16-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 16 the use of the term "consisting of" is improper in an apparatus claim as it precludes the recitation of any additional structure. The transitional phrase "consisting of" excludes any element, step, or ingredient not specified in the claim. In re Gray, 53 F.2d 520, 11 USPQ 255 (CCPA 1931); Ex parte Davis, 80 USPQ 448, 450 (Bd. App. 1948).

In claim 16 line 2 "the steering wheel" and "the driver" and in line 3 "the steering column" lack positive antecedent basis.

In claim 22 recites the functional limitation "... curves are variable in response to the vehicle speed. There is insufficient structure recited in the claim to perform this function, i.e. nothing has been recited that detects the vehicle speed..

Art Unit: 3611

In claim 23 it is not understood what “a steering recommendation” is.

In claim 28 “the means for the active application of the additional steering torque” lacks positive antecedent basis.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The claims include the use of the word “for” which indicates intended use. A claim containing a “recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus” if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

If Applicant(s) desire to give the phrase patentable weight, the Examiner respectfully recommends Applicant(s) remove “for” from the phrase where intended use is not desired.

6. Claims 16-28 (as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Weeber et al. WO 01/70555.

Note: claims 17 and 19 include the term “can be” which do not positively recite any structural limitations, only that such limitations are a possibility.

Claims 20 and 28 use the language “is designed”. This language does not add any structure to the claim as it only indicates a process which does not further limit an apparatus claim.

Claims 24-27 merely recite conclusory statements but fail to further recite any actual structure.

Weeber et al. discloses a power assisted steering system comprising:
a steering gear 8 and a hydraulic actuator 6 for assisting actuation of a steering wheel 2 by a driver of a vehicle, comprising an electric motor 5 which is coupled to a steering column and used as an additional torque actuator for actively applying an additional steering torque, also comprising an electronic control and regulating unit, wherein the electronic control and regulating unit (ECU) includes a determination unit 9.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2003/0150665 is an English language equivalent to WO 01/70555.
